**For Immediate Release:**

## **Extended Family of Non-Contacting Rotary Sensors**

With the recent introduction of its new Vert-X and RFC series potentiometers, the Novotechnik family of non-contact rotary position sensors now includes six different series of rotary position sensors. The Novotechnik family of non-contact rotary sensors extends from miniature potentiometers measuring just 8.5 mm diameter for use in medical devices to rugged rotary angle sensors sealed to IP65 to operate under adverse conditions.

These non-contact rotary sensors utilize Novotechnik's proprietary Vert-X and Magnetic Flux technologies and are available with a wide range of options including: analog, incremental, SPI, SSI, and PWM outputs; custom shaft designs; and customer-specific cabling. In all, there are dozens of models and options to choose from.

These products, together with Novotechnik's standard, hollow-shaft, single and multi-turn, and industrial grade rotary families are all detailed in the 96-page Novotechnik rotary position sensor catalog.

For more information on the Novotechnik's complete range of rotary and linear position sensors, contact Novotechnik U.S., Inc. at 155 Northboro Road, Southborough, MA 01772 • Telephone: 508-485-2244 • Fax: 508-485-02430 • [www.novotechnik.com](http://www.novotechnik.com)
