

NOVOHALL Rotary Sensor Touchless

RFC-4800

Ratiometric **Mobile Applications**

Special Features

- Touchless hall technology
- Electrical range up to 360°
- 2 part design, mechanically decoupled
- High protection class IP67, IP68, IP69
- Resolution up to 12 bit
- Wear-free
- Temperature range -40 °C to +105 °C
- One and multi-channel versions
- Optimized for use in mobile applications with highest EMC requirements such as ISO pulses and high interferences to ISO 11452 and ECE-Standard
- Suitable for safety-related applications according to DIN EN ISO 13849
- Other configurations see separate data sheets

- Mobile working machines (industrial trucks, construction machinery, agricultural and forestry machinery)
- Marine applications

The 2 part design consisting of sensor and magnetic position marker offers great flexibility when mounting. The absence of shaft and bearing makes the assembly much less sensitive to axial and radial application tolerances - separate couplings are obsolete. Measurements can be made transmissively through any non-ferromagnetic material.

With its completely encapsulated electronics the sensor is perfectly suited for use in harsh environments.

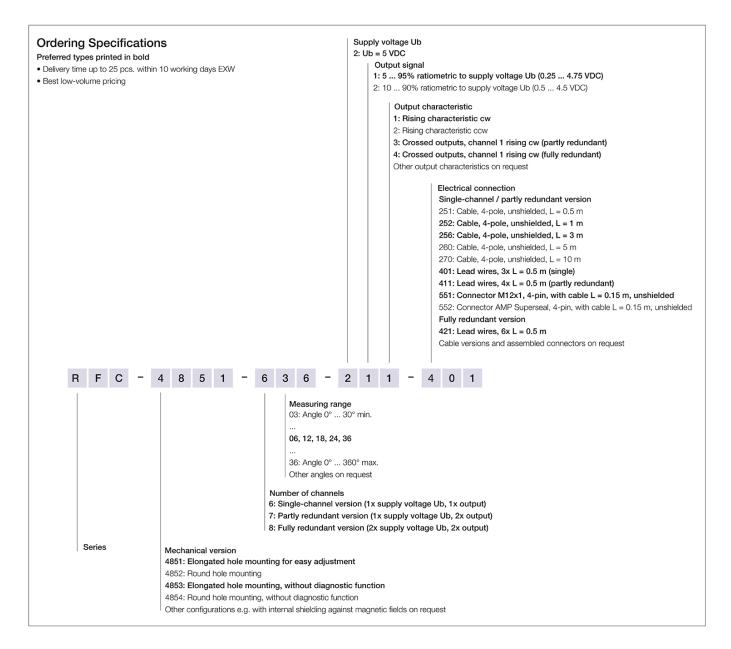

Single and dual-channel versions are available and suitable for use in safety-related applications.

Description	
Material	Housing: high grade, temperature resistant plastic
Mounting	With 2 pan head screws M4x20 (included in delivery)
Fastening torque of mounting	250 Ncm
Electrical connection	Cable 4x 0.5 mm ² (AWG 20), TPE, unshielded / Connector M12x1 or AMP Superseal with cable L = 0.15 m / Lead wires 0.5 mm ² (AWG 20), PVC
Mechanical Data	
Dimensions	See dimension drawing
Mechanical travel	360° continuous
Weight (w/o connection)	approx. 50 g

Ordering Specifications

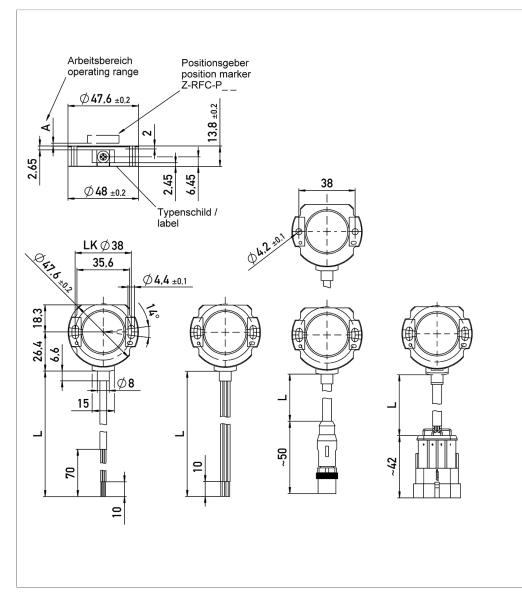

Accessories included in delivery

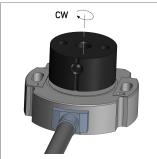

• 2x Pan head screws M4x20

Drawing

CAD data see www.novotechnik.de/en/download/caddata/

When the marking of the position marker is pointing towards the cable, the sensor output is near the electrical center position.

Lateral Magnet Offset

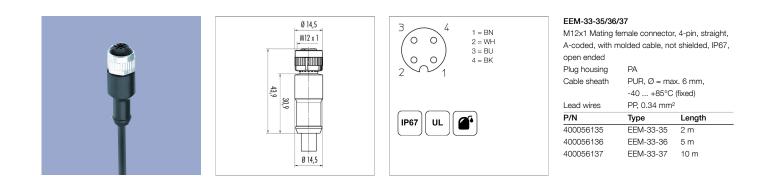

Lateral magnet offset will cause additional linearity error. The angle error, which is caused by radial displacement of sensor and position marker depends on the used position marker or magnet.

Connector System M12

Protection class IP67 DIN EN 60529

Protection class IP68 DIN EN 60529

Very good Electromagnetic Compatibiliy (EMC) and shield systems

Very good resistance to oils, coolants and lubricants

Page 12

IP68

Connecting Options on request

M12 connector

- Customized lengths
- 3-, 4-, 6- and 8-pole versions
- Protection class IP68 Ordering codes of standard versions
- see ordering specifications

Molex Mini Fit jr.

- Customized length and lead wires
- 3-, 4- and 6-pole versions
 On request

Tyco AMP Super Seal • Pin- and bushing housing

- Customized lengths
- 3-, 4- and 6-pole versions
- Protection class IP67

The specifications contained in our datasheets are intended solely for informational purposes. The documented specification values are based on ideal operational and environmental conditions and can vary significantly depending on the actual customer application. Using our products at or close to one or more of the specified performance ranges can lead to limitations regarding other performance parameters. It is therefore necessary that the end user verifies relevant performance parameters in the intended application. We reserve the right to change product specifications without notice.
