Applications

- Manufacturing Engineering (plastic injection molding, textile, packaging, sheet metal and wood work machinery)
- Automation technology

Compact design and easy to assemble via pivot heads characterize this inexpensive transducer. This transducer is suitable for various industry applications. By the simplicity of the measuring system -passive and absolute - the transducer is largely insensitive to electrical interference.

The measuring value remains despite power failure. The electrical connection can be made via a radial plug connector, a radial or axial cable.

Transducers with and without restoring spring and mounting clamp, central thread or flange plates see separate data sheets TEX.
