

NOVOHALL Rotary Sensor Touchless

RFE-3200 Voltage Mobile Applications

Special Features

- Touchless hall technology
- Electrical range up to 360°
- 2 part design, mechanically decoupled
- High protection class IP67, IP68, IP69K
- Resolution up to 12 bit
- Wear-free
- Temperature range -40 °C to +125 °C
- Single and dual-channel versions
- Optimized for use in mobile applications with highest EMC requirements such as ISO pulses and high interferences to ISO 11452 and ECE-Standard
- Suitable for safety-related applications according to DIN EN ISO 13849
- Other configurations see separate data sheets

Applications

- Mobile working machines (industrial trucks, construction machinery, agricultural and forestry machinery)
- Marine applications

The 2 part design consisting of sensor and magnetic position marker offers great flexibility when mounting. The absence of shaft and bearing makes the assembly much less sensitive to axial and radial application tolerances - separate couplings are obsolete. Measurements can be made transmissively through any non-ferromagnetic material.

With its completely encapsulated electronics the sensor is perfectly suited for use in harsh environments.

Single and dual-channel versions are available and suitable for use in safety-related applications.

Description

Material	Housing: high grade, temperature resistant plastic PBT GF30 with SS inserts
Mounting	With 2 pan head screws M4x18 (included in delivery)
Fastening torque of mounting	max. 200 Ncm
Electrical connection	6-pin MQS-connector, code A, tinned contact according to drawing AMP-114-18063-126, Index A1 (Connector: AMP P/N 1-967616-1)

Mechanical Data Dimensions See dimension drawing Mechanical travel continuous Weight approx. 50 g

Ordering Specifications

Accessories included in delivery

• 2x Pan head screws M4x18

Drawing

CAD data see www.novotechnik.de/en/download/caddata/

When the marking of the position marker points towards the connector, the sensor is near the electrical center position.

Position marker for fixation with threaded pin M4 (included in delivery)

Caution: For orientation of the output

characteristic please follow the user manual of

the position marker!

Material PA6-GF Max. permitted $\pm 3 \text{ mm}$

radial offset

Operating temp. -40 ... +125°C P/N Pack. unit [pcs]

400056074 400056085 25

Z-RFC-P43

Position marker for fixation with threaded pin M4 (included in delivery)

Caution: For orientation of the output

characteristic please follow the user manual of the position marker!

Material PA6-GF

Max. permitted ± 3 mm radial offset

Operating temp. -40 ... +125°C

P/N Pack. unit [pcs] 400105041 400105042 25

Z-RFC-P30

Position marker for frontal fixation with 2 cylinder

screws M3x8 (included in delivery).

PBT-GF Max. permitted ± 1.5 mm

radial offset

Operating temp. -40 ... +125°C

P/N Pack. unit [pcs] 400056086 400056087

Position marker for frontal fixation with 2 cylinder

screws M3x8 (included in delivery). Material PBT-GF

Max. permitted ± 3 mm

radial offset

Operating temp. -40 ... +125°C P/N Pack. unit [pcs] 400056088 400056089

Z-RFC-P22

Position marker for frontal fixation with 2 cylinder head screws M4x20 (with screw lock, included in

Attention: Closed side of position marker faces the active side of sensor.

Material

Aluminium, anodized ± 4 mm

Max. permitted radial offset

Operating temp. -40 ... +125°C

Lateral Magnet Offset

Lateral magnet offset will cause additional linearity error. The angle error, which is caused by radial displacement of sensor and position marker depends on the used position marker or magnet.
