

For Immediate Release:

Southborough, MA - Novotechnik U.S. announces the WAL300 Series of hollow-shaft angle sensors, made by our affiliate Contelec, that combines high resolution of <0.3° with low cost of \$22 in quantities of 1,000.

Housing diameter is 32 mm, and WAL300 Series is available with 6 or 8 mm D shaped hollow-shaft as well as 3/8 inch round bore with set screw. Housing height is 10 mm. Repeatability is 0.3° and operating temperature range is -25 to +75°C. Electrical travel is 0 to 340° with continuous mechanical travel.

WAL300 Series sensors' life is 4 million movements. The sensors are specified to operate when exposed to up to 50 g shock and 10 g vibration and shaft loading of up to 1 N.

Flat tabs are integrated into the housing for easy mounting. Applications WAL300 Series sensors are found in include robotics, door controls and automotive including convertible roofs and automatic tailgates of cars.
